Use-Case Model

1. Use-Cases Identification

Use case: register user

Level: user-goal level

Primary actor: Administrator

Main success scenario: The administrator logs in to his account, presses the 'Add User' button and fills in the needed details. Presses the 'Register user' button and the user is created.

Extensions: The administrator may choose to cancel the operation of creating a new user by pressing the 'Cancel' button.

Use case: user log in

Level: user-goal level

Primary actor: regular user

Main success scenario: The user presses the 'User Login' button. And then enters his or her username and password and the presses the 'Log In' button to access the account.

Extensions: The user enters the wrong username or password and the log in fails.

Use case: upload file

Level: user-goal level

Primary actor: regular user

Main success scenario: after logging in, the user presses the 'Upload File' button. The user chooses a file from the file system and then the file is uploaded into the secured folder.

Extensions: The user may choose to cancel the upload operation, or the selected file may already be present in the system.
